

THE SCIENTIFIC ASSOCIATION FOR HUNGAROLOGY RESEARCH

The Scientific Association for Hungarology Research was established in Subotica in 1991. Its primary objectives are the realisation of scientific (sociological, demographic, ethnological, legal, historical and other) researches of social character in Voivodina, collection of reference books, publication of scientific studies, organisation of conferences and lectures, etc. Its establisher was the already passed away Dr. László Rehák, retired university professor, who gathered around himself many Hungarian intellectuals, scientists and research workers from Voivodina. Since 1995 and at present the president is the university professor Dr. Irén Gábrity-Molnár. The members of the society are university and high school professors, research workers, intellectuals, journalists and public figures. *The office* is situated in Subotica, Branislava Nušića Street, which is well-equipped with PC-s, telephone, printer, Xerox machine, and has a remarkable library with books and magazines to borrow.

During its *activity* so far the Association has dealt with the following research topics: the conscience of national and religious identity, the ethnic minorities' way of life, civil and ethnic minorities' rights, education in mother tongue, the chart of the educational network in Voivodina, the migration of the Hungarians in Voivodina, realisation of demographic, local and wider historical researches, the investigation of the intellectuals' and youth's behaviour, the compilation of the directory and data base of the Hungarians in Voivodina, biographical indices, etc. The results of scientific researches are published by the members of the Association in scientific reviews of Voivodina and abroad (mainly in Hungary). The Hungarian Scientific Academy has entitled the Association to be its research centre in Yugoslavia. The Association participates on a regular basis in the meetings of the Foreign Scientific Workshops of the Hungarian Scientific Academy, in the work of the Institute of Minority Research, and in the conferences, scientific counsels and presidential sessions of the Hungarian Professors of the World.

Recently organised **scientific conferences**: Mother tongue education of the ethnic minorities living outside the borders of their motherland in the Carpathian basin (1996), The strategies of our national survival (1997), The future and the present situation of the Hungarian mother tongue education in Voivodina (1998), Demographic and migrational characteristics of the Hungarians in Voivodina (1999); as a Millenium event, a conference about the intellectual and material values of the Hungarians in Voivodina on the occasion of the publication of the book *Staying in Voviodina* (Vajdasági marasztaló) in 2001, and, in connection with the publication of the book *Home-leavers of Voivodina*, a conference about the dimensions of the migration and its consequences (2001).

Participation in the following scientific **projects**: analysis of the conscience of identity (1996), the Hungarian educational network in Voivodina (1997), questionnaires about the popularity of Duna Televízió (1998), international research of theological sociology (2000), a comparative inquiry of the labour force market in the Carpathian Basin (company lists, interviews, 2000), migration research (1999-2001), migration - questionnaires, studies (2001), the behaviour of the intellectuals in Voivodina- empirical research (Hungarian Scientific Academy, 2001), sporadic Hungarians, the Hungarian model of higher education in Voivodina (plan), changes in the structure of the Hungarian population in Voivodina (plan).
